SPECIFICATIONS

Input Power: 230-240V~50Hz
Motor: 400W
No Load Speed: 500-2900spm
Stroke Depth: 18mm
Bevel: +/- 45°
Blade Fitment: Bayonet
Cutting Capacities: Timber 55mm, Mild Steel 6mm, Plastic 12mm
Weight: 2kg

WHAT’S IN THE BOX

Jigsaw
Blade
Dust Extraction Adaptor
Allen Key

KNOW YOUR PRODUCT

JIGSAW
1. Guide Roller
2. Variable Speed Dial
3. Adjustable Shoe
4. On/Off Switch
5. Lock On Switch
6. Soft Grip Handle
7. Dust Extraction Adaptor

ACCESSORIES
8. Blade
9. Dust Extraction Adaptor
10. Allen Key

SETUP & PREPARATION

1. CHanging the Blade

Ensure the tool is disconnected from the power supply before performing any of the following operations.

1. Use allen key to loosen two blade securing bolts.

2. Remove the blade.

3. Insert the replacement blade into the blade holder with the teeth facing forward.

4. Tighten blade securing bolts.

5. Ensure the shoulder of the blade sits right at the bottom of the blade holder.

6. Ensure the blade is within the groove of the guide roller.

ONLINE MANUAL
Scan this QR Code with your mobile device to take you to the online manual.

3 YEAR REPLACEMENT WARRANTY
2. ADJUSTING SHOE ANGLE

The angle of the shoe can be adjusted to allow for bevel cuts between 0 and 45°.

1. Loosen the shoe locking screws.
2. Slide the shoe backwards.
3. Tilt the shoe between 0-45° Left or Right.
4. For faster speed, rotate speed selection dial clockwise.
   For slower speed, rotate dial anti-clockwise.
5. Slide the shoe forwards.
6. Tighten the shoe locking screws.
7. Check the angle with a protractor by making a cut in a scrap workpiece.

3. ON/OFF SWITCH

The tool is recommended for use with a residual current device with a rated residual current of 30mA or less.

1. Connect the tool to the mains power supply.
2. Ensure your workpiece securely clamped.
3. To stop cutting release the switch.
4. To lock the jigsaw on, squeeze the variable speed switch then the lock on button.
5. To unlock the jigsaw, squeeze and release the variable speed switch.
6. Release the variable speed switch, then the lock on button.
4. CUTTING

1. If using a vacuum or extraction device, first fit the dust extraction adaptor to the jigsaw.

2. Insert the correct blade into the blade holder with the teeth facing forward.

3. Mark your cutting line with a pencil.

4. Start the jigsaw. Allow it to reach maximum speed.

5. Place the base on to the workpiece and move forward with light pressure.

5. POCKET CUTTING

A pocket cut is when you need to cut a hole in the middle of a workpiece

1. Drill a hole in the workpiece using a 12mm bit.

2. Pass the blade through the hole and begin the cut.

Tip: Use light pressure when making curved cuts.
MAINTENANCE

1. After each use, blow air through the tool housing to ensure it is free from all dust particles that may build up. Build up of dust particles may cause the tool to overheat and fail.

2. If the enclosure of the tool requires cleaning do not use solvents but a moist soft cloth only. Never let any liquid get inside the tool; never immerse any part of the tool into a liquid.

Carbon Brushes

When the carbon brushes wear out, the jigsaw will spark and/or stop. Discontinue use as soon as this happens. They should be replaced prior to recommencing use of the jigsaw. Carbon brushes are a wearing component of the jigsaw therefore not covered under warranty. Continuing to use the jigsaw when carbon brushes need to be replaced may cause permanent damage to the jigsaw. Carbon brushes will wear out after many uses but when the carbon brushes need to be replaced, take the jigsaw to an electrician or a power tool repairer for a quick low cost replacement. Always replace both carbon brushes at the same time.

Note: Ozito Industries will not be responsible for any damage or injuries caused by the repair of the jigsaw by an unauthorised person or by mishandling of the jigsaw.

CARING FOR THE ENVIRONMENT

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

TROUBLESHOOTING

Excessive sparking visible through the housing air vents and/or the jigsaw failing to operate

May indicate the carbon brushes have worn out and need to be replaced. Carbon brushes should only be replaced by a qualified electrician or power tool repairer.

Cutting Metal

Your jigsaw can be used for cutting light gauge ferrous sheet and non-ferrous metals such as copper, brass, aluminium, etc. It is advisable when cutting sheet metal to clamp a backing sheet of soft wood or plywood to the work as this will enable you to obtain a clean cut without vibration and the possibility of tearing the metal. Both metal and wood backing are sawn together. Do not force the cutting blade into the metal as this will reduce the life of the blade and possibly damage the motor. Cutting thin metal will take longer than cutting even a relatively thick piece of wood, so do not be tempted to speed up the operation by forcing the saw. Spread a thin film of oil along the proposed cutting line before commencing to saw metal. Always select the right blade for the job.

How To Order

Available spare parts can be ordered through the Special Orders Desk at any Bunnings Warehouse. If you have any further questions, please contact Ozito Customer Service on:

Australia: 1800 069 486
New Zealand: 0508 069 486
enquiries@ozito.com.au
1. Work area safety

Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool.

Save these instructions and other documents supplied with this tool for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety

a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.

b. Do not use power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.

c. Do not expose power tools to rain or wet conditions. Power tools create sparks which may ignite the dust or fumes.

d. Do not use power tools while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

e. Keep cutting tools sharp and clean. Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

f. Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

g. Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

h. Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

i. Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.

j. Keep the tool's rating plate. The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate. Note: The supply of 230V and 240V on Ozito tools are interchangeable for Australia and New Zealand.

k. This tool is double insulated in accordance with AS/NZS 60745-1, therefore no earth wire is required.

l. Do not use any adapter plugs with earthed (grounded) power tools.

m. The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate.

n. Do not use any adapter plugs with earthed (grounded) power tools.

2. Electrical Safety

a. Power tool plugs must match the outlet. Never modify the plug in any way.

b. If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and used properly. Use of dust collection can reduce dust-related hazards.

c. Do not use the tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

d. Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing the power tool. Such preventive safety measures reduce the risk of starting the power tool accidentally.

e. Do not expose power tools to rain or wet conditions. Power tools create sparks which may ignite the dust or fumes.

f. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Water entering a power tool will increase the risk of electric shock.

3. Personal safety

a. Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use power tools if you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

b. Use personal protective equipment. Always wear eye protection. Protective equipment such as dust masks, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.

c. Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.

4. Power tool use and care

a. Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.

b. Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c. Do not cut through walls or cavities without first checking for hidden electrical wires.

d. Incorrect accessories can break apart at high speed and cause serious damage or injury.

5. Service

a. Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

b. If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.

Note: Double insulation does not take the place of normal safety precautions when operating this tool. The insulation system is for added protection against injury resulting from a possible electrical insulation failure within the tool.

Using an Extension Lead

Always use an approved extension lead suitable for the power input of this tool. Before use, inspect the extension lead for signs of damage, wear and ageing. Replace the extension lead if damaged or defective. When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.

JIGSAW SAFETY WARNINGS

⚠️ WARNING! The tool is recommended for use with a residual current device with a rated residual current of 36mA or less.

1. Hold power tool by insulated gripping surfaces when performing an operation where the cutting accessory may contact hidden wiring or its own cord. Cutting accessory contacting a "live" wire may make exposed metal parts of the power tool “live” and could give the operator an electric shock.

2. Do not cut hollow pipe with the jigsaw.

3. Do not use tool for purposes for which it was not designed. Always use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

4. When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.

5. When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.

6. Check for damaged or entangled cords increase the risk of electric shock.

7. Do not touch moving parts with your fingers or hand.

8. Do not cut through walls or cavities without first checking for hidden electrical wires.

9. Ensure that you have tightened the blade prior to starting the machine. Always check that the power supply corresponds to the voltage on the rating plate.

10. Do not touch the saw blade immediately after use. Allow time for the blade to cool, as it may burn you due to the heat generated during sawing.

11. Do not touch the saw blade immediately after use. Allow time for the blade to cool, as it may burn you due to the heat generated during sawing.

12. Always check accessories to ensure that they are suitable for the operating speeds of this tool.

13. Incorrect accessories can break apart at high speed and cause serious damage or injury.
IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486  
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: saw blades, dust extraction adaptor, carbon brushes.

WARNING

The following actions will result in the warranty being void.

• If the tool has been operated on a supply voltage other than that specified on the tool.
• If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
• Failure to perform maintenance as set out within the instruction manual.
• If the tool is disassembled or tampered with in any way.
• Professional, industrial or high frequency use.
